

Metal Pole Antenna & Equipment Mounting Solutions

for oDAS and Small Cell Sites

SMARTER CITIES

5G IS COMING

In order to be ready, mobile providers need to expand and densify their coverage and capacity by adding antenna locations between macro sites.

FFT offers oDAS and small cell site solutions for existing metal poles. All of our products are made in America.

Radio & Antenna Concealment

- FFT has applied the same concept behind our RCP series of smart poles to develop a radio enclosure that can be mounted at the top of a light pole.
- RF transparent doors and hinges allow antennas to be concealed within
- Dual fan ventilation provides redundancy
- Having the radios close to the antenna minimizes RF loss
- Thermal and structural analysis included with purchase order.

Pole Top

Radio Concealment T-Base

- This design is able to house all equipment for a small cell site within a typical break-away base commonly found at the bottom of street light poles.
- Three fan ventilation provides redundancy
- Thermal and structural analysis included with purchase order.

FFT-MP-RB171720

ITEM

17"x17"x20"
T-Base

Cantenna Side Arm

- Adjustable pole link supports provided to fit all diameter poles.
- Adjustable top bolts accommodate for lean in pole.
- Powder coat to match existing pole.
